

JECRC UNIVERSITY, JAIPUR
School of Engineering
November 2025
B.Tech - 1st Year, Semester-I
Subject Name – Computer Programming and Logical Thinking

Assignment #5

SECTION A (2*5=10 Marks)

1. Differentiate between inbuilt function and user defined function.
2. What do you mean by formal parameter & actual parameter.
3. Discuss reference and dereference operator.
4. Give the advantages of using pointers.
5. What do you understand by EOF?

SECTION B (7*3=21)

1. Differentiate between function declaration & function definition.
2. Differentiate between Structure and Union. Discuss array of pointers in C.
3. Explain the concept of making function calls.

SECTION C (11*3=33 Mark)

1. Explain the call by reference technique of passing parameter to a function.
2. Write a program to add two integers using function. Use call by address technique of passing parameters.
3. Explain the concept of recursive function with example. Calculate factorial of a given number using recursion.
