

JECRC UNIVERSITY, JAIPUR
School of Engineering
October 2025
B.Tech - 1st Year, Semester-I
Subject Name – Computer Programming and Logical Thinking

Assignment #4

SECTION A (2*5=10 Marks)

- Q1.** What is the difference between the `while` and `do while` loops in C?
- Q2.** What is the purpose of the `switch` statement in C? Give an example.
- Q3.** What is an array in C? How do you declare an array?
- Q4.** What are the common string manipulation functions available in C?
- Q5.** Discuss Alteration and Iteration in C with examples?
-

SECTION B (7*3=21 Marks)

- Q1.** Discuss the different types of loops in C with the help of examples.
- Q2.** What is the purpose of decision control structures in C? Explain the basic types of decision control statements in C?
- Q3.** Explain how a string can be manipulated using string handling functions in C.
-

SECTION C (11*3= 33 Marks)

- Q1.** Explain the differences between a one-dimensional array and a multi-dimensional array. Provide examples where you would use each.
- Q2.** Write a C program that prompts the user to select an arithmetic operation (addition, subtraction, multiplication, division) by entering a number from 1 to 4. The program should then ask for two numbers and perform the chosen operation.
- Q3.** Write a C program to generate a Fibonacci series upto n terms
