Session 2024–25

DIGITAL DATA AND AI LITERACY

(Course Code: DCO021A)

Submitted in Partial Fulfillment of the Curriculum Requirement for the First Year Bachelor's of Technology
Programme with Focus on Prompt Engineering and Digital Skills
under the Computer Science & Engineering (Core) Branch.

Submitted By:

**Name –Divyanshi Rajwansh
Enrollment No. – 25BCON2473
Branch – B.Tech. CSE (Core),
Semester - 1**

Submitted To:

**Mr. Hitesh Kashyap Sir
Digital Data and AI
Literacy Expert**

MODULE – 3

Practical-10

PROJECT REPORT

Claude Ai

Claude AI is an advanced **artificial intelligence chatbot** created by **Anthropic**, a company founded by former OpenAI researchers.

It works similarly to ChatGPT — it can understand, analyze, and generate human-like text. Claude is designed around “**Constitutional AI**”, meaning it follows ethical rules and safety principles to give responsible and reliable answers.

It’s named after **Claude Shannon**, the father of information theory.

Uses of Claude AI for Making a Project Report

1. Excellent at Long, Structured Documents

Claude can easily handle **20,000–100,000+ words** without losing structure. This is perfect for project reports that contain:

- Abstract
- SRS (Software Requirement Specification)
- Data flow diagrams
- Algorithms
- Pseudocode
- Frontend & backend description
- Use case tables
- ER diagrams explanation
- Testing & results

2. Very strong formatting

Claude maintains clean formatting such as:

- Headings
- Bullet points
- Numbering
- Index
- Titles
- Tables

3. Understands technical content very accurately

If your project is on:

- Web development
- AI/ML
- Databases
- Mobile apps
- Networking
- Cyber security

Claude explains concepts clearly and creates **correct technical sections**.

4. Great for SRS & system documentation

Claude is known for producing detailed:

- SRS (Software Requirement Specification)
- UML descriptions
- Data flow
- Flowcharts (in text format)
- Use case descriptions

Many students use Claude mainly for this reason.

5. Follows instructions very strictly

If you want:

- A specific format
- Word limit
- College guidelines
- Custom sections

Claude follows instructions without missing anything.

6. Produces clean, human-like writing -Project reports must look:

- professional
- original
- not robotic
- Claude's writing is very natural and human, making it safe for academic submissions.

7. Safe, controlled, and fact-checked responses

Anthropic designed Claude to reduce:

- mistakes
- hallucinations
- irrelevant details

This helps when writing technical documentation accurately.

Topic - Project Report on “Personal Budget Tracker with AI-Based Expense Categorization”

ClaudeContent is user-generated and unverified.

FR1: User Registration and Authentication

FR1.1: The system shall allow new users to register by providing email, username, and password.

FR1.2: The system shall validate email format and check for duplicate email addresses.

FR1.3: The system shall enforce password strength requirements (minimum 8 characters, including uppercase, lowercase, number, and special character).

FR1.4: The system shall send a verification email to newly registered users.

FR1.5: The system shall allow users to log in using email/username and password.

FR1.6: The system shall generate and return a JWT token upon successful authentication.

FR1.7: The system shall implement session timeout after 24 hours of inactivity.

FR1.8: The system shall provide password reset functionality via email verification.

FR1.9: The system shall log all authentication attempts for security auditing.

FR2: User Profile Management

FR2.1: The system shall allow users to view and edit their profile information.

FR2.2: The system shall allow users to upload and update profile pictures.

FR2.3: The system shall allow users to change their password with current password

2.5.2 Non-Functional Requirements

NFR1: Performance Requirements

NFR1.1: The system shall respond to user requests within 2 seconds under normal load conditions.

NFR1.2: The AI categorization process shall complete within 500 milliseconds per transaction.

NFR1.3: The dashboard shall load within 3 seconds with up to 1000 transactions.

NFR1.4: The system shall support at least 1000 concurrent users without degradation.

NFR1.5: Database queries shall execute within 100 milliseconds for 95% of requests.

NFR1.6: The system shall handle peak loads that are 3x the normal load.

NFR1.7: API endpoints shall have a throughput of at least 100 requests per second.

NFR2: Security Requirements

NFR2.1: All user passwords shall be hashed using bcrypt with a minimum of 10 salt rounds.

NFR2.2: The system shall use JWT tokens for authentication with 24-hour expiration.

NFR2.3: All communication between client and server shall be encrypted using TLS 1.2 or higher.

NFR3: The system shall implement rate limiting to prevent brute force attacks (5 failed

2.5.3 External Interface Requirements

EIR1: User Interface Requirements

EIR1.1: The UI shall use Material Design principles for consistency.

EIR1.2: The UI shall be responsive and adapt to different screen sizes (320px to 1920px+).

EIR1.3: The UI shall use a consistent color scheme throughout the application.

EIR1.4: The UI shall provide clear visual feedback for user actions.

EIR1.5: Forms shall have clear labels and placeholder text.

EIR1.6: Charts and graphs shall be interactive and provide detailed information on hover.

EIR1.7: The UI shall support light and dark themes.

EIR1.8: Navigation shall be intuitive with a clear menu structure.

EIR2: Hardware Interface Requirements

EIR2.1: The system shall run on standard x86-64 or ARM-based servers.

EIR2.2: The system shall support standard storage devices (HDD, SSD).

EIR2.3: No specialized hardware is required for deployment.

EIR3: Software Interface Requirements

Diyaan Raju x Adobe Firefly x Project report x DALL-E 2 | Open x AI-powered per x Personal Budget x what is kpi - Go x +

3. SYSTEM ARCHITECTURE

3.1 High-Level System Architecture

The Personal Budget Tracker follows a three-tier architecture consisting of:

1. Presentation Layer (Frontend):

- Responsible for user interaction and display
- Built with React.js for component-based UI
- Handles input validation and user feedback
- Communicates with backend via REST API

2. Application Layer (Backend):

- Implements business logic and rules
- Processes API requests and responses
- Manages authentication and authorization
- Integrates AI model for categorization
- Handles data transformation and validation

3. Data Layer (Database):

- Stores persistent data

Practical-11

AI CHATBOT

An **AI chatbot** is software that converses with humans (text or voice) using techniques from natural language processing (NLP) and machine learning (ML). Unlike simple rule-based bots that follow fixed scripts, AI chatbots can *understand* user input, generate fluent responses, carry context across turns, and learn from examples.

Main types

1. **Rule-based** – follows scripted if/then rules (good for narrow FAQs).
2. **Retrieval-based** – chooses the best response from a set of candidates (fast, safe).
3. **Generative (end-to-end)** – produces new text using language models (flexible, creative).
4. **Hybrid / RAG (Retrieval-Augmented Generation)** – retrieves relevant documents then generates grounded answers (best for knowledge-heavy tasks).

Core components (what makes one)

- **User interface:** chat UI, voice assistant, messaging platform.
- **NLU (Natural Language Understanding):** intent detection, entity extraction, slot filling.
- **Dialogue manager:** decides what the bot should do next (policy engine).
- **NLG (Natural Language Generation):** crafts the message returned to user.
- **Knowledge source / DB:** FAQs, product catalogs, documents, vector DB for retrieval.
- **Integration layer:** APIs to backend systems (CRM, order system).
- **Monitoring & analytics:** logs, metrics, feedback loop.
- **Safety & guardrails:** content filters, rate limits, privacy controls.

Common use cases

- Customer support (answering FAQs, ticket triage).
- Virtual assistants (scheduling, reminders).
- Sales & lead qualification (pre-screen prospects).
- Onboarding & training (interactive tutorials).
- Internal tools (devops help, HR queries).
- Education & tutoring.
- Healthcare triage / symptom checkers (with regulatory constraints).
- Entertainment (games, chat companions).

Dialogflow for AI chatbots

Dialogflow is considered a strong platform for building AI chatbots because it combines ease of use with powerful natural language understanding. It can recognize user intent accurately, extract important details, and handle multi-turn conversations without requiring heavy coding. Its interface is simple, allowing beginners to create intents, entities, and responses quickly, while still offering advanced features like contexts, fulfillment webhooks, and integrations for developers. Dialogflow also connects easily with major platforms such as websites, apps, WhatsApp, Facebook Messenger, and Google Assistant, making deployment fast. Since it runs on Google's cloud infrastructure, it benefits from high reliability, scalability, and continuous improvements in language understanding. Overall, it provides both simplicity and flexibility, making it suitable for small bots as well as complex AI-driven conversational systems.

In Dialogflow, **intents** are the core building blocks that represent what the user wants to do or say. When a user types a message, Dialogflow compares the message with all available intents and selects the one that best matches the user's meaning. Each intent contains training phrases (examples of what users might say), parameters or entities (important details like dates or names), and responses that the bot will give back.

There are two main types of intents: **default intents** and **non-default intents**. **Default intents** are automatically created by Dialogflow for basic conversation handling. The **Default Welcome Intent** is used to greet the user when the conversation starts, while the **Default Fallback Intent** activates when Dialogflow cannot understand the user's message. These help maintain a smooth flow and prevent the bot from getting stuck.

On the other hand, **non-default intents** are custom intents created by the developer. These represent actual tasks or questions the chatbot must handle, such as booking an appointment, checking order status, providing course details, or answering FAQs. They define the real functionality of the chatbot since they address specific needs of the users. Together, default and non-default intents allow Dialogflow agents to handle both basic conversation management and domain-specific queries effectively.

CHATBOT- E-commerce website Chat-bot using Dialogflow

The screenshot shows the Dialogflow console interface. On the left, a sidebar lists various components: Intents, Entities, Knowledge, Fulfillment, Integrations, Training, Validation, History, Analytics, Prebuilt Agents, and Small Talk. The main area is divided into two tabs: 'Intents' and 'Integrations'. The 'Intents' tab is active, displaying a list of intents with a search bar and a 'CREATE INTENT' button. The 'Integrations' tab is also visible, showing a 'Dialogflow Messenger' widget that can be added to a website. The widget includes a code snippet for integration and a 'TRY IT NOW' button.

The screenshot displays the Dialogflow chatbot interface. At the top, there's a 'CREATE INTENT' button and a 'Try it now' button. The chatbot is titled 'E-Commerce'. The conversation flow is as follows:

- Chatbot: Hello! I can help you choose the right PC or accessories. What are you shopping for today?
- User: Hi
- Chatbot: Hello! How can I help you?
- User: Show me gaming PCs
- Chatbot: I've got several PCs that fit your request. What's your price range?
- User: Show me gaming PCs
- Chatbot: I've got several PCs that fit your request. What's your price range?
- User: Recommend a good gaming setup
- Chatbot: I'd love to help! 🌟 Can you tell me your budget and main use (gaming, work, design, editing, etc.)?
- User: What's the best laptop for students?
- Chatbot: Based on your needs, I'd suggest:
 - 🎮 For gaming: RTX 4060/i7 build
 - 💻 For work: Ryzen 5 with 16GB RAM
 - ✍️ For editing: i7 + 32GB + SSD setupWould you like links to view these?
- User: Ask something...

Practical-12

Poster

1. What is Sketch?

A **sketch** is a quick, rough drawing made to capture the basic idea, shape, or outline of something.

- Usually done with pencil or charcoal
- Not very detailed
- Used for planning or practice

Example: A rough outline of a building drawn in 2 minutes.

2. What is Drawing?

A **drawing** is a detailed artwork made using lines.

- Created with pencils, pens, charcoal, or markers
- Focuses on outlines, shading, and details
- Black-and-white or colored

Example: A detailed pencil drawing of a face.

3. What is Painting?

A **painting** is artwork made with **wet colors**.

- Uses paints like watercolor, acrylic, or oil
- More about colors, texture, and brush strokes
- Usually done on canvas or paper

Example: A colorful landscape made with oil paints.

4. What is Photo (Photograph)?

A **photo** is an image captured by a **camera**.

- Not drawn—it's a real-world capture
- Can be digital or printed
- Shows exact details of a moment

Example: A selfie taken on your phone.

5. What is Poster?

A **poster** is a large printed or digital visual display used to share information, advertise something, or convey a message using text + images.

It is designed to be eye-catching and easy to understand quickly.

Simple words:

A poster is a big visual message used to inform or promote something.

Where Are Posters Used?

Posters are used in many places, such as:

- **Schools & colleges** (projects, events, awareness campaigns)
- **Businesses** (product promotions, sales, discounts)
- **Public spaces** (road safety, health awareness, government messages)
- **Online** (social media posts, digital advertisements)
- **Events** (concerts, seminars, workshops, festivals)

Why Do We Use Posters?

Posters are used because:

- They **grab attention quickly**
- They allow **easy communication** of information
- They are **cheap and easy to create**
- They can reach a **large audience**
- They work for **promotion, education, awareness, and branding**

How to Create a Poster Using AI (Brief Version)

1. **Choose an AI Tool**
Use tools like Canva, Adobe Express, Microsoft Designer, or DALL·E.
2. **Write a Prompt**
Tell the AI what kind of poster you want.
Example: “Create a bright, clean poster for a school event with title and date.”
3. **Generate the Design**
The AI will create a poster layout, images, and style based on your prompt.
4. **Edit & Customize**
Modify text, colors, fonts, images, and layout to match your needs.
5. **Download & Use**
Export your poster as PNG, JPG, or PDF for printing or sharing online.

POSTER-1-Blood Donation Event

Prompt- Create a bold and impactful poster for a Blood Donation Camp happening at JECRC University in the Central Lawn on 25th November. Use a clean medical theme with red and white colors, blood drop icons, and a heart-shaped pulse line. Show students and volunteers participating in a donation drive, medical staff assisting donors, and a donation setup with beds and equipment. Include a strong headline like ‘Save Lives, Donate Blood’ and add event details clearly. The overall style should be modern, eye-catching, and suitable for a college awareness campaign.

POSTER

Description- The poster features a clean white background with a bold red headline at the top that reads “**Save Lives, Donate Blood.**” Below the text, a red heartbeat line stretches across the width of the poster, decorated with small heart icons and blood drop elements to emphasize the theme of life and donation.

The central illustration shows a group of doctors, nurses, and student volunteers standing around a person who is donating blood on a medical bed. The scene conveys teamwork, care, and participation in a community health initiative

POSTER-2-Political Gathering

Prompt: Create a clean and modern poster for a public community gathering at Raja Park Stadium, Jaipur. Use simple colors, clear typography, and add visuals like a stage, a microphone, and a crowd symbol—without showing any specific person or political elements. Add a headline such as ‘Public Community Event’ and highlight the venue: Raja Park Stadium, Jaipur. Keep the design minimal, neutral, and informative.

POSTER

Description- The poster has a clean, modern, and minimal design with soft colors and a professional layout. At the top, the headline “**PUBLIC COMMUNITY GATHERING AT RAJA PARK**” is written in a large serif font, giving the poster a formal and organized feel.

Below the title, a short line invites people to join the event and highlights its purpose—community connection, sharing ideas, and celebrating togetherness.

The central image shows a simple stage with a microphone placed at the center, surrounded by silhouettes of people, symbolizing an open public forum or community meet-up.

POSTER-3-Future-2050

Prompt- Create a futuristic poster set in the year 2050. Use neon colors, holographic effects, and a sci-fi cityscape with flying vehicles, advanced technology, smart robots, and eco-friendly architecture. Add digital UI elements, glowing lines, and transparent screens to give a high-tech look. Include a bold headline like 'Future 2050' or 'A Glimpse Into Tomorrow.' The design should look modern, sleek, imaginative, and visually immersive.

POSTER

Description: The poster showcases a vibrant futuristic theme set in the year **2050**, glowing with neon pink, purple, and blue tones. At the top, the bold text “**FUTURE 2050**” appears in bright neon pink, giving a strong sci-fi feel. The central figure is a humanoid robot with illuminated blue eyes, detailed circuitry patterns, and a glowing outline, representing advanced artificial intelligence and future robotics. The robot stands in front of a futuristic cityscape filled with glowing skyscrapers, holographic domes, and floating digital interfaces. Flying vehicles hover in the sky, adding to the high-tech atmosphere. Vertical neon lines and digital grid effects run across the poster, enhancing the cyberpunk aesthetic. Overall, the poster depicts a bold, technologically advanced vision of the year 2050, blending robotics, neon lighting, and a sci-fi city environment.

POSTER-4-Awareness

Prompt- Create an environmental awareness poster about protecting hilly regions from over-construction, resorts, and uncontrolled development. Show damaged mountain landscapes, deforestation, landslides, and disrupted wildlife. Contrast this with visuals of preserved, green, peaceful hills. Use earthy tones like green and brown. Add a strong headline such as ‘Save Our Hills, Not Build Over Them’ or ‘Protect Hills from Over-Construction.’ Include icons of trees, mountains, and eco-protection, and keep the design impactful, educational, and nature-focused.

POSTER

Description- The poster has a powerful visual contrast showing the impact of over-construction on hilly regions. The top features a bold green headline: “**SAVE OUR HILLS – NOT BUILD OVER THEM.**”

The main image is split down the center:

- **Left side** shows a damaged, eroded, grey mountain slope, symbolizing destruction caused by deforestation and construction.
 - **Right side** shows a lush green hill full of healthy forest, representing natural beauty and untouched ecology.
- Deer are placed on both sides, emphasizing wildlife affected by human actions.

POSTER-5-College Convocation

Prompt: Create an elegant and celebratory Convocation poster for a college event on 10 december 2025. Use the official college colors white and red throughout the design. Include graduation caps, certificates, laurel wreaths, and silhouettes of students celebrating. Add a bold headline like ‘Convocation Ceremony 2025’ and clearly highlight the date: 10 December 2025. Use a clean, modern layout with a prestigious and formal feel suitable for an academic event

POSTER

Description- The poster has a formal and sophisticated design with a deep red background symbolizing the college colors. At the top, the text “**JECRC University**” appears in a classic serif font, giving the poster an academic and prestigious feel.

The main headline “**Convocation Ceremony**” is written in large, gold typography, followed by “**Batch of 2025,**” making the purpose of the poster clear and celebratory.

Around the poster, simple golden line-art illustrations of graduation caps and academic symbols add a festive touch without cluttering the design.

At the bottom, the event details are displayed in gold:
“**December 10th, 10 AM.**”

Practical-13

Brochure

What is a Brochure?

A **brochure** is a small booklet or folded paper used to give information about a product, service, place, event, or company.

In simple words: *A brochure is a short promotional paper with images and text used for marketing or information.*

Examples:

- Travel brochures
- School/college admission brochures
- Product brochures
- Hotel or restaurant brochures

Features:

- Contains multiple sections or folds
- Includes images, headings, and short descriptions
- Easy to read and visually attractive

What is a Template?

A **template** is a pre-designed layout that you can fill with your own content. It gives you a ready-made structure so you don't have to design from scratch.

In simple words:

A template is a ready design that you can edit and use.

Features:

- Saves time
- Already formatted
- You only add text, images, or details

What is the Best Quality & Pricing for Brochures?

- **Quality:**
 - Use **170–250 gsm** paper (thick and premium)
 - Choose **glossy or matte finish**
 - Full-colour printing
 - Neat, accurate folding
- **Pricing (India average):**
 - Small quantity: **₹6–₹25 per brochure**

- Bulk (500+): **₹3–₹10 per brochure**
- Premium paper/lamination costs more

What is a Tri-Fold Brochure?

A **tri-fold brochure** is a single sheet folded **twice**, creating **3 panels on each side** (total 6). It is commonly used by businesses, schools, hotels, restaurants, and events.

Simple:

A tri-fold is a brochure with three sections that open like a small booklet.

Use of DALL·E AI in Making Brochures

DALL·E is an AI image generator. It helps by creating **unique images and graphics** for your brochure.

How DALL·E Helps:

- Creates **custom illustrations or photos** for your brochure theme
- Generates **backgrounds**, icons, textures, and creative visuals
- Allows you to match a **specific style** (minimal, modern, vintage, luxury, etc.)
- Saves time if you don't have stock images or a designer
- Helps maintain **consistent branding** by generating images in the same style

Use of Adobe Firefly in Making Brochures

Adobe Firefly is an AI design tool built into Adobe Express, Photoshop, Illustrator, and InDesign.

How Adobe Firefly Helps:

- Generates **AI-designed brochure layouts** automatically
- Creates **high-quality images, graphics, and patterns**
- Lets you create **text effects**, stylish titles, and decorative elements
- Auto-fills backgrounds, removes unwanted objects, and enhances photos
- Provides **ready-made brochure templates** you can edit easily
- Integrates smoothly with Adobe software for professional design work

Brochure-1

College clubs

Prompt- Create a professional tri-fold brochure with 6 faces promoting college clubs in my college. Use a clean, modern academic theme with vibrant student-friendly colors. Include these fictional club names

- Swaraag- The music club
- QDC- The dance club
- Abhiyakti- The drame club

Rhythm & Beats Music Club – band nights, training

Front panel: College logo space + title ‘Discover Your Clubs’.

Inside panels: One club per panel with short description + icons.

Back panel: Contact info + QR code placeholder.

Generate the final brochure in a **printable, high-resolution, CMYK, print-ready tri-fold layout** suitable for printing.

Output:

Brochure- 2

Menu of a restaurant

Prompt- Create an elegant, luxury restaurant menu design with a refined white-and-gold color palette, minimalistic layout, and premium typography. Use royal aesthetics with soft gold borders, subtle textures, and classy icons. Include sections: Starters, Soups, Main Course, Chef's Specials, Desserts, and Beverages. Feature a fusion menu combining Chinese, Italian, and French cuisine. Add space for logo at the top, signature dishes highlighted, and a clean footer for contact details. Generate the final menu in a **print-ready, high-resolution, CMYK format** suitable for fine-dining restaurants

Output-

Brochure-3

Start-up

Prompt- Create a professional tri-fold brochure with 6 faces for a cybersecurity startup specializing in advanced firewall services. Use a modern tech-themed design with dark navy, electric blue, and white colors. Include visuals of digital shields, network security grids, encrypted data lines, and server protection icons.

Front Cover: Company name, tagline 'Next-Gen Firewall Protection', glowing shield graphic.

Inside Left: Overview of firewall services, clean infographics, cyber-protection visuals.

Inside Center: Features like intrusion prevention, malware blocking, network monitoring.

Inside Right: Benefits for businesses — safety, speed, reliability, 24/7 protection.

Back Panel: Contact details, QR code space, minimal tech background.

Back Inside Panel: Pricing plans or package overview.

Output-

Cultural Event

Prompt- Design a vibrant tri-fold brochure with 6 faces for a grand cultural event. Use rich festive colors like maroon, gold, and royal blue. Add illustrations of traditional dance, music instruments, folk patterns, lanterns, rangoli motifs, and cultural silhouettes.

Front Cover: Event name, date, venue, and a decorative cultural emblem.

Inside Left: Introduction to the cultural festival, theme, and purpose.

Inside Center: Event highlights — dance performances, music shows, art exhibitions, food stalls, workshops.

Inside Right: Schedule timeline with icons for each activity.

Back Panel: Contact info, QR code for registration, sponsor logos.

Back Inside Panel: Guest performers, special attractions, or ticket details.

Ensure a festive, high-resolution, printable tri-fold brochure layout suitable for professional printing

Output-

Brochure-5

Trip Planning

Prompt- Design a beautiful tri-fold brochure with 6 faces for a travel trip to Jaipur, Rajasthan. Use warm colors like pink, saffron, and sandstone tones inspired by the Pink City. Include visuals of iconic Jaipur landmarks such as Hawa Mahal, Amer Fort, City Palace, Jantar Mantar, Nahargarh Fort, and local bazaars. Add elements like Rajasthani patterns, camels, royal arches, and traditional motifs.

Front Cover: Title 'Explore Jaipur – The Pink City Trip', dates, stunning Hawa Mahal image.

Inside Left: Introduction to Jaipur, culture, history, and what the trip includes.

Inside Center: Day-by-day itinerary with visuals of forts, palaces, markets, and food stops.

Inside Right: Activities – sightseeing, shopping, cultural shows, adventure options.

Back Panel: Contact details, QR code for booking, travel organizer info.

Back Inside Panel: Package details – inclusions, exclusions, pricing, and hotel info.

Create a high-resolution, printable tri-fold brochure with a travel-friendly, vibrant aesthetic.

Output-

Practical -14

Event promotion With AI and social media

Use of Canva AI in Making an Event Promotion Post

Canva AI helps you design visually appealing event posts quickly.

How it helps:

- **Magic Design:** Upload a photo or give a description; Canva generates multiple ready-made post designs.
- **AI Layout Suggestions:** It automatically arranges text, images, and colors for a professional look.
- **AI Image Generation:** Create unique background images or event-themed illustrations.
- **Magic Write:** Helps write catchy captions, taglines, and event descriptions.
- **Brand Kit:** Keeps all posts aligned with your brand colors, logo, and fonts.
- **Resize Tool:** Instantly adapt your post for Instagram, Facebook, LinkedIn, Stories, etc.

Result:

Fast, polished, aesthetic posts with consistent branding.

Use of Perplexity AI in Making an Event Promotion Post

Perplexity AI helps you gather accurate information and create strong content for your post.

How it helps:

- **Research:** Quickly collect details about your event theme, trending hashtags, audience interests, and current design trends.
- **Content Creation:** Generates event descriptions, punchlines, registration info, and CTA (Call to Action) text.
- **Ideas & Inspiration:** Provides examples of best-performing event posts, color combinations, and styles.
- **Fact Checking:** Ensures all event details are accurate before posting.

Result:

Clear, catchy, and well-researched content that enhances engagement.

Post-1-Event

Prompt- Create a catchy, high-engagement promotional social media post for an upcoming “Social Night” at JECRC University. The event will be held at the Central Lawn on 16th November, starting at 4 PM.

DESCRIPTION:

- Energetic, youthful tone
- Highlights like music, dance, fun activities, and community vibe
- A strong call-to-action
- Suitable for Instagram, WhatsApp, and posters
- Short headline + engaging body text + hashtags
- Optionally suggest color theme and design style for the post

OUTPUT:

Post-2-Fair Election

Prompt- Create an informational and unbiased social media post explaining the importance of voting in an upcoming election. Include a clean layout, clear call-to-action encouraging voter awareness, simple icons, and neutral colors. Avoid promoting any specific political party.

Description- A neutral, education-focused post that raises awareness about voter participation. Ideal for civic awareness campaigns. Uses calm tones, minimal graphics, and clear text to keep the message informative and balanced without representing any political party.

Output:

Your Voice Matters: Vote in the Upcoming Election

Make a Choice

Remember the Date

Shape Your Future

Stay Informed. Vote Responsibly.

Post-3-Social Media Ads

Prompt- Create a modern, eye-catching social media post based on the latest viral trend. Use energetic visuals, bold typography, and trending design styles. Add a short catchy caption, hashtags, and a layout suitable for Instagram Reels or story ads.

Description- A trendy, visually bold design inspired by currently popular formats (viral fonts, meme layouts, aesthetic reels-style color palettes). This post focuses on grabbing attention instantly and appealing to youth audiences active on Instagram and TikTok.

Output:

Post-4-Brand Promotion

Prompt- Create a high-quality promotional social media post for a brand. Include a clean product mockup image, a short compelling tagline, key product highlights, brand colors, and a professional layout optimized for Instagram and Facebook ads.

Description- A polished and professional post designed to market a product or service. Uses branding elements, modern layout, and attractive product visuals to increase brand visibility and engagement.

Output-

DISCOVER YOUR POTENTIAL

SMARTWATCH FOR A BETTER LIFESTYLE

Elevate your health and fitness journey

Post-5- Digital Detox Day

Prompt- Create a calming and aesthetic social media post promoting **Digital Detox Day**. Include an AI-generated image of nature, mindfulness, or a peaceful outdoor scene. Add a soft, motivational headline, a short caption encouraging people to take a break from screens, and a clean layout with soothing colors like teal, pastel green, and beige. Make the post suitable for Instagram and Facebook.

Description- This post inspires audiences to pause, relax, and reconnect with the real world. The theme uses minimalistic, nature-inspired visuals and a peaceful color palette to create a refreshing, mindful mood. Ideal for wellness pages, student communities, lifestyle brands, or general motivation content.

Output-
