

Assignment (Unit-4)

SECTION A (5 questions * 2 marks = 10 Marks)

1. ▪ Define cyberbullying and explain how privacy settings can help prevent it.
2. ▪ What are the warning signs of a social media scam?
3. ▪ What are the key indicators of a malicious email attachment?
4. ▪ Define email spoofing and explain its purpose in cyberattacks.
5. ▪ What is Wi-Fi security? Mention two basic methods to secure a wireless network.

SECTION B (3 questions * 7 marks = 21 Marks)

1. A user receives a friend request from an unknown profile that appears genuine. Analyze the risks involved, explain how attackers create fake identities, and describe preventive measures.
2. Explain how email-based attacks occur by discussing phishing, spoofing, and malicious attachments. Also explain how users can identify and prevent such attacks.
3. Discuss the importance of securing a home Wi-Fi network by explaining common attacks and best practices to prevent unauthorized access.

SECTION C (3 questions * 11 marks = 33 Marks)

1. A company is facing repeated email-based cyberattacks leading to data breaches. Design a comprehensive email security strategy including technical controls, user awareness, and monitoring mechanisms.
2. Discuss data backup strategies by comparing online and offline backups, explaining causes of data loss, and proposing a complete backup plan for an organization.
3. A laptop was infected with malware after downloading files from an untrusted source. Explain how malware spreads, prevention techniques, and design a complete endpoint security strategy.
