- Q.3
- Memory
 - Critical Thinking

Q.4 Empathy is the ability to understand and share the feelings, thoughts and emotion of others and respond to them in a caring manner.

- Q.5
- Meditation
 - Time Management

PART - B

Q.1 Importance :- Cognitive skills are essential in the workplace as they help employees think clearly, solve problems, make decision and adapt to changes. These

skills improve productivity, efficiency and innovation. Good cognitive abilities also enhance communication and help in handling complex tasks effectively.

Strategies to improve:

1. Continuous learning :- Reading, training and skill development programs.
2. Problem-solving practice :- Engaging in puzzles or real-life challenges.
3. Time management :- Prioritizing tasks improve focus.
4. Healthy lifestyle :- Proper sleep, diet and exercise boost brain function.
5. Mindfulness techniques :- Improve attention and concentration.

Q.2 Stages of problem-solving:

1. Identifying the problem :- Understanding the issue clearly.
2. Analyzing the problem :- Gathering relevant information.
3. Generating solutions :- Brainstorming possible solutions.
4. Selecting the best solution :- Evaluating alternatives.
5. Implementing and evaluating :- Applying and ~~also~~ reviewing results.

Obstacles :-

1. Mental set - Relying on old methods and not thinking creatively.
2. Lack of information - Incomplete data leads to poor decisions.

Q.3 Concept : Non-cognitive skills are personality traits and interpersonal abilities that influence behavior and success in life. They help individuals manage emotions, interact effectively and achieve goals.

Types :

1. Communication skills : Ability to express ideas clearly (e.g, presentations).
2. Emotional intelligence : Understanding and managing emotions (e.g, staying calm in conflicts).
3. Teamwork : Working effectively with others (e.g group projects).

PART - C
